Calculation of Assets Under Management

References to total "assets under management" or "AUM" represent assets managed by Oaktree and a proportionate amount of the AUM reported by DoubleLine Capital LP ("DoubleLine Capital"), in which Oaktree owns a 20% minority interest. Oaktree's methodology for calculating AUM includes (i) the net asset value ("NAV") of assets managed directly by Oaktree, (ii) the leverage on which management fees are charged, (iii) undrawn capital that Oaktree is entitled to call from investors in Oaktree funds pursuant to their capital commitments, (iv) for collateralized loan obligation vehicles ("CLOs"), the aggregate par value of collateral assets and principal cash, (v) for publicly-traded business development companies, gross assets (including assets acquired with leverage), net of cash, and (vi) Oaktree's pro rata portion (20%) of the AUM reported by DoubleLine Capital. This calculation of AUM is not based on the definitions of AUM that may be set forth in agreements governing the investment funds, vehicles or accounts managed and is not calculated pursuant to regulatory definitions.

Oaktree's Investment Philosophy

Oaktree's Underwriting Criteria and Investment Process Have Been Demonstrated Across Market Cycles

Primacy of Risk Control

- Control primarily for risk, rather than return
- May underperform in the most bullish markets, but prudence across investing environments and limiting losses has been foremost in our investment approach over time and throughout cycles

Avoid Losers & Winners Take Care of Themselves

- Avoidance of investments that could impair capital over long term
- Opportunistic generation of meaningfully higher return potential in certain environments

Market Inefficiency

- The private credit market is a relatively less efficient, less well trafficked market, providing opportunities for incremental return relative to risk
- Willingness to invest and lend during times of market stress, when others are retreating

Benefits Of Specialization

- Expertise in creative, efficient structuring and institutional knowledge of bankruptcies and restructurings enables a focus on risk control that competitors lack

Emphasis On Consistency

- An emphasis on consistency is a core tenet of Oaktree's investment philosophy and approach
- We allow the market to dictate opportunities; we need not rely on macro forecasts

Selectivity

- Oaktree's platform provides an extensive reach across credit markets providing access to deal flow and the ability to be highly selective

Emphasis on fundamental credit analysis, consistency and downside protection are key tenets of Oaktree's investment philosophy, all of which are strongly aligned with the interests of Oaktree Specialty Lending shareholders

Oaktree's Approach to Direct Lending

Emphasis on Proprietary Deals

- Focus on proprietary investment opportunities as well as partnering with other lenders as appropriate
- Leverage the networks and relationships of Oaktree's over 250 investment professionals
- Dedicated sourcing professionals are in continuous contact with private equity sponsors, management teams, capital raising advisors and corporations

Focus on High-quality Companies and Extensive Diligence

- Focus on companies with resilient business models, strong underlying fundamentals, significant asset or enterprise value and seasoned management teams
- Leverage deep credit and deal structuring expertise to lend to companies that have unique needs, complex business models or specific business challenges
- Maintain discipline around fundamental credit analysis with a focus on downside protection
- Conduct extensive diligence on underlying collateral value whether cash flows, hard assets or intellectual property

Employ Innovative Loan Structures to Manage Risk

- Leverage Oaktree's significant expertise in identifying structural risks and developing creative solutions in an effort to enhance downside protection
- Limited experience and expertise of other lenders with credit agreements may reduce competition for certain opportunities
- Include covenant protections designed to ensure lenders can get back to the table and "stop the clock" before a deal reaches impairment

Disciplined Portfolio Management

- Reduce the impact of individual investment risks by diversifying portfolios across industry sectors
- Monitor the portfolio on an ongoing basis to manage risk and take preemptive action to resolve potential problems

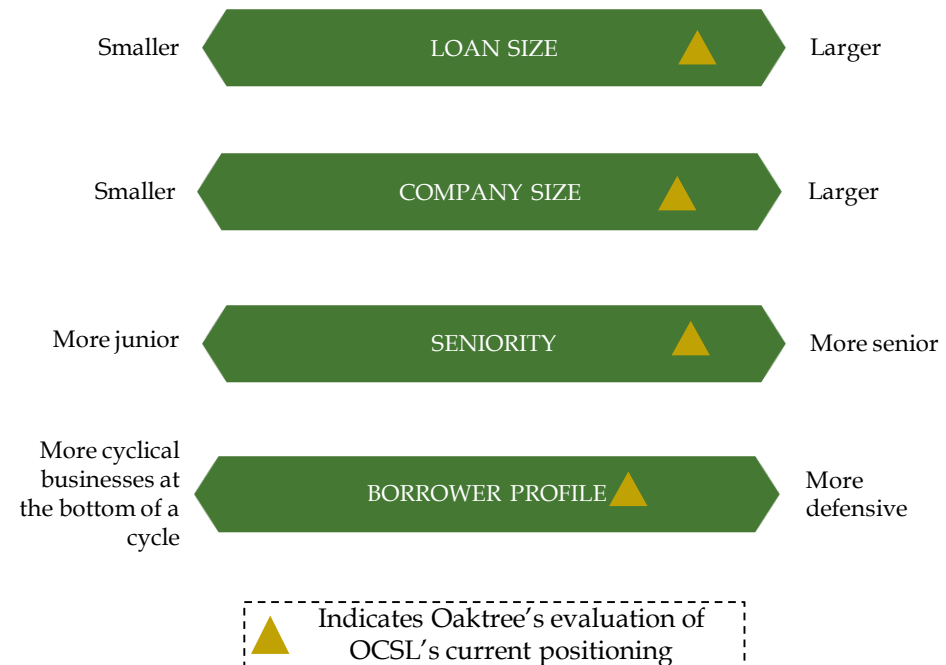

Market Environment Dictates Oaktree's View on Optimal Portfolio Positioning

Middle Market Environment

- A recovery in the financial markets, fueled by stimulus measures that have boosted liquidity and the availability of credit, has reduced the imminent capital needs of many companies
- While investor confidence has improved, lenders appear poised to recapture some covenant protections and wider spreads following years of looser loan documents and tighter spreads in the pre-pandemic environment
- However, company fundamentals remain at risk, causing many middle market issuers to focus on mitigating the impact of the pandemic by preserving liquidity and reducing costs
- Oaktree believes there will be an increase in compelling private investment opportunities to businesses seeking to increase liquidity or capitalize on growth potential resulting from the pandemic

Portfolio Positioning

OCSL is well-positioned to invest in this environment given Oaktree's demonstrated track record of investing across market cycles

Oaktree's Extensive Origination Capabilities

Extensive, Global Credit Platform to Source Deal Flow

- Strong market presence and established relationships with financial sponsors, management teams, capital raising advisors, banks and individual issuers
- Emphasis on proprietary deals: Frequent “first look” opportunities, well positioned for difficult and complex transactions
- Established reputation as a “go-to” source for borrowers, large and small, due to longstanding track record in direct lending; with over \$19 billion invested in more than 350 directly originated loans since 2005¹

Ability to Address a Wide Range of Borrower Needs

- Capability to invest across the capital structure
- Certainty to borrowers by seeking to provide fully underwritten finance commitments
- Capacity to fund large loans
- Expertise in performing credit, as well as restructuring and turnaround situations

Extensive origination capabilities leads to greater ability to source quality investments

Notes: On a supplemental basis, the Company is disclosing adjusted net investment income and per share adjusted net investment income, each of which is a financial measure that is calculated and presented on a basis of methodology other than in accordance with U.S. GAAP ("non-GAAP"). Adjusted net investment income represents net investment income, excluding capital gains incentive fees ("Part II incentive fee"). The Company's management uses this non-GAAP financial measure internally to analyze and evaluate financial results and performance and believes that this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends for the Company without giving effect to capital gains incentive fees. The Company's investment advisory agreement provides that a capital gains-based incentive fee is determined and paid annually with respect to realized capital gains (but not unrealized capital appreciation) to the extent such realized capital gains exceed realized capital losses and unrealized capital depreciation on a cumulative basis. Refer to Note 11 – Related Party Transactions in our Quarterly Report on Form 10-Q for further discussion. The Company believes that adjusted net investment income is a useful performance measure because it reflects the net investment income produced on the Company's investments during a period without giving effect to any changes in the value of such investments and any related capital gains incentive fees between periods. The presentation of adjusted net investment income is not intended to be a substitute for financial results prepared in accordance with GAAP and should not be considered in isolation.

Numbers may not sum due to rounding.
